

TWO CASING SIZES - ONE ANCHOR & ONE PACKER

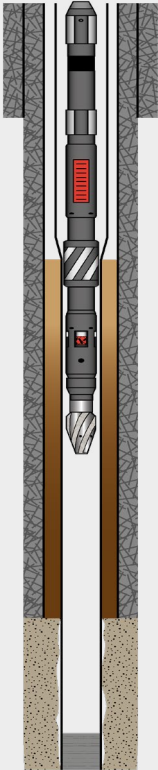

The industry's only BHA with the ability to set in 9 5/8" x 10 3/4" casing on the same trip

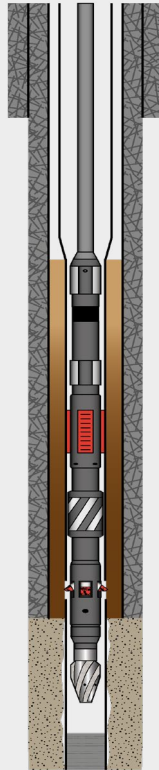

Ardyne's technology is changing clients approach to Casing Recovery. The ability to recover casing efficiently versus conventional methods improves safety, reduces rig time and offers new methods which can be relied upon to reduce planned operational spend.

No requirement for a marine swivel - TRIDENT packer integral to BHA - Can cut, circulate & recover 9 5/8" x 10 3/4" in single trip

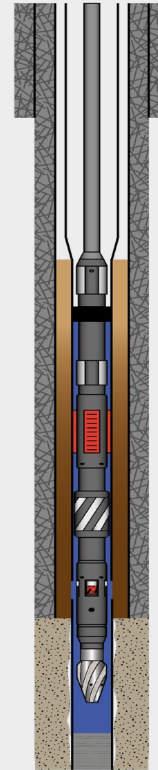

1. Run in hole

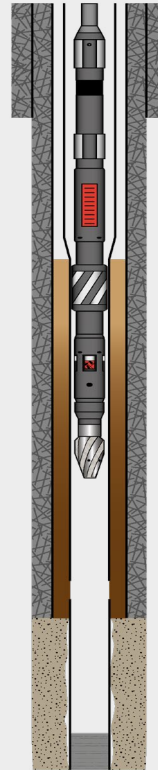

2. Make cut & verify free

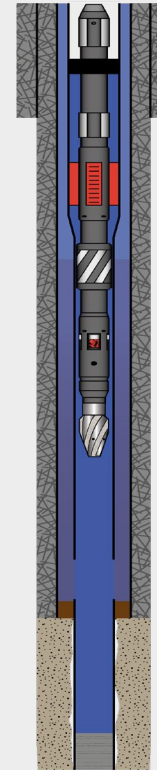

3. Set packer & attempt to circ.

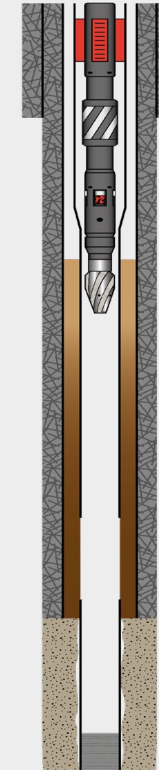

4. Relocate to 10 3/4" hanger

5. Set packer & attempt to circ.

6. Relocate & Pull Casing

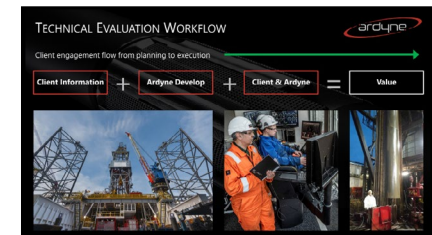

Ardyne Offshore Team

"Ardyne provided us with a truly single trip system. Enabling us to recover 2,451ft of casing after cutting the 9 5/8" and recovering to surface while anchored in 10 3/4".

The ability to set the packer on the TRIDENT system in both 9 5/8" and 10 3/4" casing allowed us to attempt circulation without the requirement for an additional trip, reducing project hours and time spent in the red zone."

Petrofac UK

Features & Benefits	BHA preassembled	No requirement for marine swivel	Able to set packer in 9 5/8" casing	Ability to circulate out settled solids	Able to set packer in 10 3/4" casing	Reposition to hanger - reset anchor, pull free
