

REDUCING CO₂ EMISSIONS ON NORTH SEA OPERATIONS

TRIDENT® - Enabling single trip operations to reduce rig time and lower carbon emissions

14.61 hour rig time saving reduces CO₂ emissions from a semi-sub rig by 25 tonnes - average 2MW power usage.

Ardyne Operational Rig Time Savings

This is the equivalent of removing 36 fully loaded diesel trucks driving the 546 miles from Aberdeen to London*.

*An Artic truck averaging 9mpg emits 722kg of CO₂
